PRODUCT DESCRIPTION

Degreaser is a powerful water-based, non-flammable degreaser and cleaner for use on all surfaces that can be cleaned with water. **Degreaser** is used to clean metal parts, greasy surfaces of floors, counters, equipment and all industrial applications where a non-flammable degreaser and cleaner is required.

BENEFITS

- **Non-flammable and non-combustible:** **Degreaser** will not burn even when soaked onto rags or other absorbent material. Even the concentrated product is completely non-flammable. It is the ultimate safety cleaner.
- **Non-corrosive:** **Degreaser** is non-corrosive to steel and will not attack aluminum at the standard 1:5 dilution. It is pH controlled and contains special corrosion inhibitors.
- **Highly efficient:** **Degreaser** can be diluted up to 1:25 for light duty cleaning and will clean heavy greasy surfaces at 1:5 dilution.
- **Penetrates and removes grease:** **Degreaser** works much more efficiently than typical emulsifier degreasers. It penetrates through the greasy soil and breaks the bond at the surface. Thus the greasy film is lifted off completely, and the surface is left clean with no oily film remaining. Just apply, let it penetrate, and flush the surface clean.

ENVIRONMENTAL IMPACT

Degreaser contains no butyl solvents, chlorinated solvents, EDTA, NTA or other toxic substances.

HOW TO USE

- 1) Dilute the **Degreaser** according to the surface to be cleaned. 1:5 for heavy duty cleaning, degreasing. Up to 1:25 for light duty cleaning.
- 2) Spray on the clean cleaning solution to thoroughly wet the surface. For heavy accumulations, agitate with a scrub pad, or brush.
- 3) Simply wipe off the soil, or flush off with a strong water spray.

PROPERTIES

Type: Water-based nonflammable degreaser.

Color: Yellow

Odor: Citrus

Toxicity: Non-toxic – Do not take internally

Flammability: Non-flammable

Composition: Biodegradable surfactants and citrus solvents with non-butyl solvent boosters. Contains no EDTA or NTA.
